

## Earth Support Corporation Co., LTD Carbon dioxide Emissions Reduction

### Targets Certified by the SBT Initiative.

Earth Support Corporation Co., LTD (“Earth Support”) assent to the SBT.

Earth Support calculated the carbon dioxide emissions of the entire supply chain related to our activities and declared our carbon dioxide reduction target by 2030.

### What’s SBT ?

SBT is a greenhouse gas emission reduction target set by companies for the next 5 to 15 years, consistent with the standards required by the Paris Agreement.

SCIENCE  
BASED  
TARGETS

DRIVING AMBITIOUS CORPORATE CLIMATE ACTION

### Approaches to accreditation.

The calculation of carbon dioxide emissions was supported by Carbon Free Consulting Co., Ltd. through the mediation of San-in Godo Bank Co., Ltd.

Based on the management philosophy of Akartus Holdings Group, Earth Support will realize a sustainable society through our resource recycling business, and we will work toward carbon neutrality so that we can lead the Sanin region.

### Reduction target.

Based on FY2021, we will reduce carbon dioxide emissions from fuel and electricity consumption by 42% by2030.

Earth Support is committed to calculating and reducing our carbon footprint throughout our supply chain.

### Actions to achieve our reduction targets are as follows:

- Promote of environmental management system
- Consider the introduction of renewable energy
- Use non-fossil certificate and J-credits
